

NGUYEN TRONG THUY

Full-stack Software Engineer

(+84) 977691072 | thuyngtrong@gmail.com | Hanoi, Vietnam | GitHub

Introduction

I enjoy building products that are practical, reliable, and easy to maintain. As a Full-stack Software Engineer with around 5 years of experience, I have worked across web, mobile, SaaS, and cloud-based systems, with a focus on application development, system integration, deployment workflows, and day-to-day engineering ownership.

Technical Skills

- Programming & Development: **PHP** (Laravel, WordPress/WooCommerce), **JavaScript**, **TypeScript**, **React**, **React Native**, **HTML**, **CSS**
- Cloud & Infrastructure: **Linux** (Ubuntu/Debian), **Apache**, **LiteSpeed**, **Docker**, **Google Cloud** (Cloud Run, Cloud SQL, Storage)
- DevOps & Delivery: **CI/CD**, **Git**, **GitLab**, **GitHub Actions**, deployment, monitoring, troubleshooting
- Databases & Messaging: **MySQL**, **SQL Server**, **Firebase**, **RabbitMQ**
- Other Strengths: Functional programming, OOP, technical documentation, Figma collaboration

AI Experience

- AI Features: **Chat Completion**, **Text-to-Speech**, **Speech-to-Text**
- AI Tooling & Observability: **Cursor**, **Claude Code**, **Langfuse**

Soft Skills

- Cross-cultural collaboration with international partners across time zones
- Problem-solving in complex, multi-environment systems
- Adaptability with new tools and technologies
- Clear technical writing and workflow documentation
- Ownership in automation, scalability, and reliability improvements

Professional Experience

Akktis, France-based

Software Engineer (DevOps & Full-stack)

May 2024 – Present

Worked on website and mobile application development, server migration, and cloud infrastructure in an international outsourcing and consulting environment.

Development and Infrastructure Responsibilities

- Manage Linux-based server environments (Ubuntu/Debian) via SSH, including deployment, monitoring, troubleshooting, and optimization.
- Design and maintain **CI/CD** pipelines for mobile applications and web servers across multiple environments.
- Deploy and manage services on **Google Cloud**, including **Cloud Run**, **Cloud SQL**, and Storage.
- Configure and optimize **LiteSpeed** and **Apache** web servers for multiple applications.
- Implement **API integrations** for mobile applications and backend services.
- Work with **Laravel**, **WordPress/WooCommerce**, and **PrestaShop** in cloud and on-premise environments.

Project and System Support

- Migrated legacy infrastructure from custom database management to **MySQL** on **Apache**.
- Contributed to infrastructure documentation, workflow improvement, and security hardening in an international team.

Independent Software Engineer

Client Side Projects (part-time alongside full-time employment)

May 2024 – Present

Delivered web, mobile, and cloud-based projects for clients across education, marketing, and client-facing digital products.

IELTS AI Tutor Mobile App | React Native, TypeScript, Firebase, GCP

2024 – Present

Mobile learning application for IELTS preparation with connected teacher-facing workflows.

- Developed the mobile application for iOS and Android covering Listening, Reading, Writing, and Speaking practice.
- Built a connected assignment portal for teachers and student practice workflows.
- Implemented AI-supported features including **chat completion**, **text-to-speech**, and **speech-to-text**.
- Deployed and maintained backend services on **Google Cloud Run**.
- Supported app-to-portal communication and cloud-based operations.
- Used **Langfuse** for analysis and observability in the application.
- Google Play: IELTS AI Tutor on Google Play
- App Store: IELTS AI Tutor on the App Store

Educational Site | Switzerland Client | Jimdo

Nov 2025 – Feb 2026

Responsive website for a healthy schools initiative.

- Created and maintained the site on Jimdo.
- Managed responsive layouts and ongoing site updates.
- Supported content presentation and user engagement goals.

Looneyes Studio Website | WordPress/SEO

Feb 2025 – Apr 2025

Multilingual website project for a drone show company across multiple domains.

- Designed and deployed pages for EN, JP, and CN domains.
- Implemented SEO elements including meta tags and schema markup.
- Domains: looneyesstudio.com, looneyesstudio.jp, looneyesstudio.cn

BaseVN | Hanoi, Vietnam

Full-stack Engineer

Mar 2022 – Oct 2023

Worked on large-scale SaaS products across HRM, Payroll, and E-Government systems.

Product Development

- Contributed to development, deployment, and integration across multiple internal products and workflows.

Project Highlights

- **Base VSS (Vietnam Social Security) | Jun 2023 – Oct 2023**
 - Built and maintained data synchronization pipelines between VSS, HRM, and Payroll applications.
 - Developed Excel import/export and XML export features for tax authority compliance.
 - Contributed to deployment workflows and integration with external government systems.
- **Base PIT (Personal Income Tax) | Dec 2022 – Oct 2023**
 - Designed database schema and optimized queries for 500,000+ records.
 - Developed Excel/XML pipelines for reporting and HRM/Payroll synchronization.
 - Improved performance and reliability during product launch support.
- **Base E-Hiring (Applicant Tracking System) | Mar 2022 – Oct 2023**

- Integrated APIs such as VietnamWorks and TopCV for automated job posting and candidate data synchronization.
- Improved system performance, reporting modules, and Excel workflows.
- Contributed to email server functionality and monitoring.

Leave Management System

.NET Developer Intern

Oct 2021 – Dec 2021

- Built a final project using **ASP.NET Core MVC**, **Entity Framework**, and **SQL Server**.
- Gained experience in system deployment, database management, and front-end development.

Education

Information System

Thuy Loi University, Hanoi
